

XVT 10.2 Release Notes

Features:

- Added guided configuration script for XVTnet.

Changes:

- Rewrote CImageButton for better performance [API Change]
- Made mousewheel scrolling automatic on scrollable Pwr++ objects.
- Updated helpc to create CHM projects instead of HLP.
- Updated Design templates to produce .vcproj projects.
- Changed Netlink for Windows to static linking.

Bugfixes:

- Fixed a major issue preventing mousewheel scrolling on Windows.
- Fixed issue where scrollbar callbacks were passing bad values.
- Fixed issue where opening old Design projects in a newer version would hide part of the layout under the toolbar.

Known Issues:

- Mousewheel scrolling doesn't work on NScrollText.
